

SUPPLEMENTAL PUBLIC NOTICE

US Army Corps
of Engineers
New York District
Jacob K. Javits Federal Building
New York, N.Y. 10278-0090
ATTN: Regulatory Branch

Public Notice Number: 2005-00365-L4 (SUPP)
Issue Date: 21 July 2005
Expiration Date: 12 August 2005

To Whom It May Concern:

The New York District, U.S. Army Corps of Engineers, issued Public Notice Number 2005-00365-L4 on June 4, 2005 describing an application for Department of the Army authorization submitted by Long Island Power Authority and Long Island Offshore Wind Park, LLC to construct an offshore wind energy generating facility. We are extending the comment period for that Public Notice until August 12, 2005 due to some incorrect mailing addresses which delayed receipt of the Public Notice and resulted in a limited comment period for some interested parties.

You can view a copy of the original Public Notice which includes a detailed work description and drawings at:

<http://www.nan.usace.army.mil/business/buslinks/regulat/lipa/pn/index.htm> or request a copy by contacting this office.

The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit which reasonably may be expected to accrue from the proposal must be balanced against its reasonably foreseeable detriments.

All factors which may be relevant to the proposal will be considered including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, floodplain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, consideration of property ownership and, in general, the needs and welfare of the people.

The Corps of Engineers is soliciting comments from the public; Federal, state, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in preparation of an environmental assessment and/or an environmental impact statement pursuant to the National Environmental Policy Act. Comments are also used to determine the need for a public hearing and to determine the overall public interest of the proposed activity.

ALL COMMENTS REGARDING THE PERMIT APPLICATION MUST BE PREPARED IN WRITING AND MAILED TO REACH THIS OFFICE BY AUGUST 12, 2005, otherwise it will be presumed that there are no objections to the proposed activity. Previously submitted comments do not need to be resubmitted to this office.

CENAN-OP-RE
PUBLIC NOTICE NO. 2005-00365-L4 (supp)

Any person may request, in writing, before this public notice expires, that a public hearing be held to receive information necessary to consider this application. Requests for public hearings shall state, with particularity, the reasons why a public hearing should be held. It should be noted that information submitted by mail is considered just as carefully in the permit decision process and bears the same weight as that furnished at a public hearing.

If you have any questions concerning this application, you may contact this office at (917) 790-8526 and ask for Mary Ann Miller.

FOR THE DISTRICT ENGINEER

A handwritten signature in cursive script that reads "Richard L. Tomer".

Richard L. Tomer
Chief, Regulatory Branch
